

FIG. 1 is a perspective view of a portable electronic device 10 with its cover 12 open. The device 10 includes a main body 14 and a cover 12. The main body 14 houses a battery 16, a display 24, and various connectors and switches. The cover 12 is shown in an open position, revealing the internal components. The device 10 is shown in a perspective view, with the cover 12 open, revealing the internal components. The device 10 includes a main body 14 and a cover 12. The main body 14 houses a battery 16, a display 24, and various connectors and switches. The cover 12 is shown in an open position, revealing the internal components. The device 10 is shown in a perspective view, with the cover 12 open, revealing the internal components.

FIG. 1.

FIG. 2 is a perspective view of the assembly 10 in a second position, where the assembly 10 is in a folded position. The assembly 10 includes a first panel 24 and a second panel 28. The first panel 24 is connected to the second panel 28 by a hinge 30. The hinge 30 includes a plurality of parallel lines 38. The first panel 24 includes a rectangular opening 36. The second panel 28 includes a rectangular opening 34. The assembly 10 is shown in a folded position, where the first panel 24 is partially overlapping the second panel 28.
